Attachment to Advisory Action Paper No. 20080925

Response to Arguments

Summary of Remarks (@ response page labeled 5): Chaney does not disclose applying additional geometrical information to the adapted deformable surface model of the object.

Examiner's Response: As the user is allowed to edit the template to become a desired shape, the template is an adapted deformable surface model of the object prior to the further processing of step 177. By comparing the resulting template to the additional training images, this is applying additional geometrical information to the template.
